APPENDIX “EXECUTION QUALITY CONTROL” · ORDER BEST EXECUTION POLICY · CONTROL GRID

Quarterly execution quality control grid

Version 0.9
Internal

Completed by RCCI **Frequency** Quarterly; annual summary to the Board of Directors **Kept by** RCCI · retained for at least ten years

QUARTER REVIEWED

NUMBER OF ORDERS RECEIVED

SAMPLE REVIEWED

No.	Indicator	Method	Alert threshold	Result	Discrepancy and corrective measure
1	Orders transmitted in the expected session	Time of receipt compared with the cut-off time and the transmission session	Below 98%		
2	Compliance with chronological order	Comparison of receipt and transmission time stamps for the same security	One unjustified inversion		
3	Execution rate of limit orders	Orders executed over orders transmitted, by security	Analysis if below 50% on a liquid security		
4	Market orders with a documented warning	Check of records of information given to the client	One order without a record		
5	Prices obtained	Comparison with the session fixing price	One unexplained discrepancy		
6	Competitive quoting for government securities	Appendix “Government securities quotes” sheets: number of quotes, quote selected	Fewer than two quotes without justification		
7	Allocation of aggregated orders	Recalculation of the pro rata on partial executions	One incorrect allocation		
8	Time taken to send trade confirmations	Date sent compared with execution date	Later than the following business day		
9	Execution errors	Incident register	Any error: root cause analysis		
10	Execution-related complaints	Complaints register	Any complaint: analysis
